### Borger Express Pipeline

### Borger Express Pipeline Scope

The Borger Express System will have its primary origin point in Cushing, Oklahoma with a destination point in Borger, Texas. The Borger Express System will additionally offer an origin point at Ruby Station in Major County, Oklahoma. Shippers will be required to provide arrangements for their own origin and destination storage. The Borger Express System will transport crude oil between 18.5-60.0° API, with other parameters defined in the system’s tariff.

Navigator expects, if Navigator proceeds with the project, that the Borger Express System will be in-service in the first quarter of 2022.

### **Binding Open Season Bid Process**

Interested potential shippers that desire to receive copies of the Open Season documents are required to execute a Confidentiality Agreement in the form available at [www.borgerexpress.com](http://www.borgerexpress.com) (the “CA”). It is recommended that interested potential shippers submit the CA on or before October 19, 2020 to give those shippers adequate time to evaluate the Open Season documents.

### **Open Season Documents**

Navigator will provide the following documents as part of this Open Season package to interested potential shippers that sign a CA:

- Confidential Open Season Terms
- Form Transportation Services Agreement (“TSA”) with pro forma tariff
